

# Micro-LTE

## High Performance Multi-Protocol Embedded UHF RFID Module

The 2-port Micro-LTE delivers the size, operating efficiency, RF power, and flexibility needed to embed UHF RFID in best-in-class fixed position, portable, and hand held applications where small form factor is important. The Micro-LTE is optimized for applications with small tag populations reading up to 50 tags/second and features low power consumption needed for battery operated solutions. Micro-LTE's wide RF output range (-5 dBm to +30 dBm) is a key requirement for RFID enabled printers, tag commissioning stations, and point of sales readers. Edge connections allow the Micro-LTE to be soldered directly to a motherboard as a standard component. The on-board connectors allow the module to be mated to a motherboard.
